Information is subject to change without notice. Northern Telecom reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules, and the radio interference regulations of Industry Canada. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their own expense.

Meridian 1 is a trademark of Northern Telecom.

Revision history

October 1997

Issue 9.00, Standard, published for Generic X11 Release 23.

September 1996

Issue 8.00, Standard, published for Generic X11 Release 22.

November 1995

Issue 7.00, Standard, published for Generic X11 Release 21B.

July 1995

Issue 6.00, Standard, published for Generic X11 Release 21A.

December 1994

Release 5.00, Standard, for Generic X11 Release 20.

July 1994

Release 4.00, Standard

February 1994

Release 3.00, Standard

January 1993

Release 2.00, Issue 2.0, Standard

April 1992

Release 2.00, Issue 1.0, Standard.

About this guide	v
Chapter 1 — ISDN Interfaces: DTI and PRI	1
Overview of ISDN	1
Digital Trunk Interface	2
ISDN interfaces	2
Primary Rate Interface	3
Chapter 2 — ISDN features	9
64 kbps Clear Data Transport	10
Attendant and Network Wide Remote Call Forward	10
Attendant Blocking of DN	14
Automatic Trunk Maintenance (ATM)	23
B-Channel Overload Control	24
Backup D-Channel	37
Basic Call Service	38
Call Connection Limitations	40
Call Forward All Calls/No Answer	41
Call Forward, Break-In and Hunt Internal or External Network Wide	42
Call Forward/Hunt Override via Flexible Feature Code	46
Call Page Network Wide	54
Call Park Network Wide	59
Call Pick-Up	69
Call Pickup Network Wide	69
Called Party Disconnect Control	86
Calling Line Identification	86
Calling Line Identification in Call Detail Record (CCDR)	89

Centralized Attendant Service (CAS)	90
Calling Party Privacy	90
Coordinated Dialing Plan	103
Data Packet Network Access X.25	104
DCH Error Reporting and Monitoring	104
Direct Inward System Access (DISA)	106
Display of Calling Party Denied	106
E.164/ESN Numbering Plan Expansion	115
Electronic Lock Network Wide/Electronic Lock on Private Lines	134
Emergency Services Access	146
Error Handling on ISDN Signaling Link Analog E&M TIE Trunks	149
ESN on PRI/ISL	153
Flexible Night Service	154
Flexible Numbering Plan Enhancement	155
Idle Extension Notification	157
In-Band ANI; (Automatic Number Identification)	160
Incoming Trunk Programmable Calling Line Identification	160
ISDN Calling Line Identification enhancements	163
ISDN QSIG Basic Call	196
ISDN QSIG Call Completion	200
ISDN QSIG Call Diversion Notification	209
ISDN QSIG Generic Functional Transport	225
ISDN QSIG Name Display	227
ISDN QSIG Path Replacement	235
Integrated Service Access (ISA)	247
Integrated Trunk Access (ITA)	250
ISDN – International 1.5/2 Mb/s Gateway	251
ISDN Networking: Advanced Network Services	255
ISDN Signaling Link (ISL)	256
ISDN Signaling Package	257
Manual Trunk Service	257
Meridian 1 PRI to DMS-100	257
Meridian Mail Trunk Access Restriction	259
Message Waiting Indication (MWI)	266
National ISDN 2 TR-1268 Primary Rate Interface	273
Network ACD (NACD)	276
Network Alternate Route Selection	277

Network Attendant Service	278
Network Call Party Name Display (NCPND) and Network Name Delivery (NND)	297
Network Call Redirection (NCRD)	300
Network Call Transfer and Attendant Extended Calls	301
Network Hunt	301
Network Intercom (Hot Type D and Hot Type I Enhancements) ..	301
Network Message Services - Meridian Mail	308
Network Message Services - Message Center	310
Network Ring Again	311
Network Wide Listed Directory Numbers	312
NI-2 Call By Call Service Selection	315
Non-Associated Signaling Channels (nB+D)	335
NPI and TON in CDR Tickets	336
Primary Rate Access Package	346
Remote Virtual Queuing	347
T309 Timer	357
Trunk Anti-Tromboning	358
Trunk Optimization (Meridian-1 to Meridian-1 only)	398
Trunk to Trunk Connection	400
Virtual Network Services	404
Virtual Network Services Virtual Directory Number Expansion ..	424
Chapter 3 — Network Clocking	433
Clocking in a Digital World	433
The Need for Synchronization	433
Synchronization Methods	435
North American Hierarchical Synchronization	435
Timing Reference	436
Node Categories/Stratum	436
Frame Slip	438
Guidelines	439
Chapter 4 — PRI Implementation	447
Overview	447
Hardware Requirements	448

Circuit cards	448
Cables	448
Channel Service Units	448
Echo Cancellor	448
Hardware description	449
NTAK09 DTI/PRI circuit card	449
NTAK20 Clock Controller (CC) daughterboard	450
Shelf slot assignment	450
Clocking modes	450
Clock controller LED states	451
NTAK93 D-Channel Handler Interface (DCHI) daughterboard ..	452
NTBK51 Downloadable D-Channel daughterboard	452
Installing PRI hardware	453
Mounting the daughterboards on the NTAK09	454
Removing the daughterboards from the NTAK09	456
Setting the switches	456
Inserting the NTAK09 into the main cabinet	457
Connecting the cables	457
Software enabling the card	458
Programming Meridian 1 to Meridian 1 PRI	459
Prerequisites	459
Restrictions and Limitations	459
Programming procedure	459
Programming Meridian 1 to DMS-100 PRI	469
Configurations allowed	469
Accessing an ISA Route member	470
ISA Programming	472
Programming procedure	474
Chapter 5 — DTI Implementation	485
Overview	485
Hardware Requirements	485
Cables	486
Channel Service Units	486
Echo Cancellor	486

NTAK09 DTI/PRI circuit card	486
NTAK20 Clock Controller (CC) daughterboard	487
Clocking modes	488
LED states	489
Installing DTI hardware	490
Mounting the NTAK20 daughterboard on the NTAK09	490
Removing the NTAK20 daughterboard from the NTAK09	492
Setting the switches	492
Inserting the NTAK09 into the main cabinet	492
Connecting the cables	493
Software enabling the card	493
Programming DTI	494
Compatibility	494
Restrictions and Limitations	494
Programming procedure	494
Chapter 6 — DTI/PRI Maintenance	499
Maintenance overview	499
Monitoring Option 11 DTI/PRI operation	500
Maintenance messages	500
Alarms	503
NTAK09 Faceplate LEDs	503
Monitor Jacks	505
Using Option 11 DTI/PRI maintenance tools	506
Maintenance commands	506
NTAK09 DTI/PRI power on self-test	510
NTAK20 power on self-test	510
NTAK93 self-test	510
DTI/PRI local self-test	511
DTI/PRI automatic local loopback test	512
DTI/PRI error detection	515
Frame slip	518
Frame slippage improvement timers	523
Frame alignment	524
Automatic clock recovery	528

Replacing Equipment	529
Chapter 7 — ISL Implementation	531
Overview	531
Hardware Requirements	532
Shared Mode	532
Dedicated Mode	533
Restrictions and limitations	535
Installation procedure	535
Software Programming	537
Programming Meridian 1 to Meridian 1 ISL	537
Programming Dedicated mode	538
Chapter 8 — ISL Maintenance	545
Maintenance overview	545
Maintenance messages	545
Using Option 11 ISL maintenance tools	549
Maintenance commands	549
Maintenance messages	551
Maintenance testing	551
Chapter 9 — ISDN Feature Implementation	553
Overview	553
Configuring applications and features	553
Attendant and Network Wide Remote Call Forward	556
Attendant Blocking of DN	560
B-Channel Overload Control	561
Backup D-Channel	562
Call Forward, Break-In and Hunt Internal or External Network Wide	565
Call Page Network Wide	566
Call Park Network Wide	569
Call Pickup Network Wide	572
Calling Line Identification (CLID)	579

Calling Party Privacy	581
Display of Calling Party Denied	583
E.164/ESN Numbering Plan Expansion	585
Electronic Lock Network Wide/Electronic Lock on Private Lines ...	594
Error Handling on ISDN Signaling Link Analog E&M TIE Trunks ..	600
Flexible Numbering Plan Enhancement	601
Incoming Trunk Programmable Calling Line Identification	602
International 1.5/2.0 Mb/s Gateway	603
ISDN CLID enhancements	605
ISDN QSIG Basic Call	612
ISDN QSIG Call Completion	613
ISDN QSIG Call Diversion Notification	616
ISDN QSIG Generic Functional Transport	625
ISDN QSIG Name Display	626
ISDN QSIG Path Replacement	629
ISDN Signaling Link	633
Meridian Mail Trunk Access Restriction	639
Message Waiting Indication (MWI) Interworking with DMS	640
National ISDN 2 TR-1268 Primary Rate Interface	647
Network Attendant Service	649
Network Call Party Name Display (NCPND) and Network Name Delivery (NND)	655
Network Call Redirection (NCRD)	658
Network Intercom (Hot Type D and Hot Type I Enhancements)	662
Network Message Services - Message Center (NMS-MC)	664
Network Ring Again (NRAG)	666
Network Wide Listed Directory Numbers	667
NPI and TON in CDR Tickets	669
Remote Virtual Queuing (RVQ)	670
Trunk Anti-Tromboning	674

Virtual Network Services	675
Virtual Network Services Virtual Directory Number Expansion	682

Appendix A — Basic and Network Alternate Route Selection (BARS/NARS) 689

Introduction	689
Network class of service	692
Facility Restriction Level	693
Expensive Route Warning Tone	694
Queuing features	694
Basic/Network Alternate Route Selection	694
Uniform dialing plan	695
UDP for on-net calling	695
UDP for off-net calling	696
BARS access code	701
NARS access codes	701
Network translation	702
Automatic least-cost routing	703
Digit manipulation	705
Time-of-Day routing	706
Flexible ESN “0” Routing	707
Automatic on-net to off-net overflow	707
Multiple DID Office Code Screening (X11 release 5+)	708
Incoming trunk group exclusion (X11 release 5+)	709
Off-net number recognition (X11 release 5+)	710
Supplemental digit restriction (release dependent)	712
Digit translation / restriction / recognition	713
Free Calling Area Screening	717
Expensive Route Warning Tone	718
BARS or NARS bypass control	718
Network Speed Call	719
1 + dialing	721
Network control	722
SL-1 Main NCOS	722
SL-1 node TCOS	723

Compatibility with ETN switches	724
Network signaling	724
Satellite Link Control	727
Routing control	727
NCOS map	728
Invoking Routing Control	728
Network traffic measurements	729
TFN001 routing measurements	729
OHQ measurements	730
CBQ measurements	730
TFN002 NCOS measurements	730
TFN003 incoming trunk group measurements	730
BARS implementation	731
Configuring BARS	732
NARS implementation	741
Configuring NARS	741

Appendix B — Network Queuing 751

Introduction	751
Off-Hook Queuing	752
OHQ eligibility	752
OHQ availability	753
OHQ offer	753
OHQ traffic measurements	754
Feature interactions	755
Call-Back Queuing	756
CBQ options	756
CBQ eligibility	756
CBQ offer	757
CBQ callback	758
CBQ traffic measurements	758
Feature interactions	759
Coordinated Call-Back Queuing	759
CCBQ eligibility	759
CCBQ offer	760

CCBQ callback	760
CCBQ traffic measurements	761
Feature interactions	761
Call-Back Queuing to Conventional Mains	763
CBQCM eligibility	763
CBQCM offer	763
CBQCM callback	764
CBQCM traffic measurements	765
Feature limitations	765
Coordinated Call-Back Queuing Against Mains	766
